Math 5320 Course Syllabus - Spring 2015

Meets: TR 2:00-3:20 in GAB 406

Instructor: Dr. Pieter Allaart

Office: GAB, Room 415; Phone: 369-7313

Office Hours: (tentative)
- Tue 11-12
- Wed 2-3
- Thu 11-12 and 1-2
- and by appointment.

You are also welcome to drop by outside office hours without an appointment. Keep in mind that I may be busy, and I may ask you to wait or to come back later.

E-mail: allaart@unt.edu

Book: Real Analysis (4th Edition), by H. L. Royden

Grading: Grades will be based on class participation (20%), homework (40%), a mid-term exam (20%), and a final exam (20%).

Mid-term Exam: The mid-term exam is scheduled for Thursday, March 12. (There is a chance that this will change.)

Final Exam: The final exam will be on Thursday, May 14 at 1:30 pm, unless you are notified otherwise.

Homework: Homework will be assigned periodically, and you will always be given at least one week to complete it. You are allowed to work together on the homework, but in the end, everybody is expected to understand the solution. I would prefer to see original solutions.

Most of the exercises involve proofs. I expect complete rigor! Write clearly and legibly. Show ALL of the details. Your work should be double spaced so that I may write comments and give you feedback. This means one blank line between every two lines of writing.

Solutions of many exercises in the book can be found online. Keep in mind that these often contain mistakes (sometimes to the point of being 100% faulty), so by
copying them uncritically your grade may be lower than you might expect. Plus, you won’t learn anything, you won’t put yourself in a good position to pass a qualifying exam, and you will fail to impress me. Better do your own thinking!

Homework which is messy or difficult to read will not be graded. If you could not come to class, and missed the assignment, it is your responsibility to find out what the assignment is.

**Attendance:** You are expected to attend class at all times, except when you are ill or have some other extenuating circumstance. If you cannot come to class, you should contact me before class. Unauthorized absences will usually harm the class participation portion of your grade. The same is true for arriving late for class without a valid excuse.

**Qualifying Exam:** This course helps you prepare for the Real Analysis qualifying examination. If you plan to take this qualifying exam, the best thing you can do to help your chances of passing it is to do well in this course. I recommend you take complete notes and keep any handouts in a safe place for future reference.

**Disabilities:** It is the responsibility of students with certified disabilities to provide the instructor with appropriate documentation from the Dean of Students Office.

**Cheating:** No cheating will be tolerated. Anyone caught cheating will be subject to any penalty the instructor deems appropriate, up to and including an automatic F for the course. Furthermore, a letter will be sent to the appropriate dean.
