General rules:

- Due Wed. 14 April 2004
- No late papers
- No copying (but you can work together)
- A perfect paper is worth 20 pts toward your overall midterm score figured out of 100 (but this score cannot exceed 100).
- Papers may be graded by grading a sample of problems, then prorating according to the number of problems reasonably attempted.
- Be careful to work the correct problems! These problems are taken from the “Review Exercises” at the end of each chapter, not the “Chapter Tests” and not the regular exercises at the end of sections.
